A two-way component speaker system with separate tweeter units, midbass drivers and passive crossovers. Complete with a mounting kit to fit the tweeters in more than one application and screws and fixings. The magnets on the midbasses are much bigger than either the Vibe or the Rainbow offerings, even allowing for the nice rubbery boots on them and the cones are honest paper pulp. The passives are high power designs with massive, thick-wired inductors, despite the very low declared nominal power handling of 50w RMS.

- Power Handling 50wRMS
- Sensitivity 92dB 1w/1M
- Own Pink noise test figure 114.0dB (Vol @20 @ trk 9 dB Drag Vol III)
- Passband 50 Hz to 20kHz
- Tweeter diameter 25mm
- Tweeter Mounting Depth 18mm
- Midbass Mounting Depth 76mm
- Cone: Non-pressed paper pulp
- Tweeter: T25 Hand treated fabric
- Crossover slope & point: 6dB per octave lowpass, 12dB per octave highpass @ 4.5kHz
- Chassis: pressed steel
- Complete with: fixings and tweeter mounting kits
